*\*Note: Much of this content and Huber overview graciously taken from the original APA Prospectus.*

## Welcome!

This diploma program has been carefully structured to provide tuition for all students of astrology, regardless of whether they are approaching the subject for the first time, are practising astrologers seeking an alternative approach or are searching for a new dimension to their own life. Students work at home, at their own pace, with my support and guidance along the entire journey.

This course teaches the techniques of the Hubers' psychological approach to chart interpretation for working with clients.

For many years there has been a dramatic growth of interest in the serious application of astrology, as opposed to the popular 'Sun Sign' astrology. This has been particularly so in the use of the birth chart as a psychological tool to help towards developing greater conscious awareness, recognising individual potential and encouraging self-expression. Our belief in the Huber world is that everyone is a unique human being and that as astrologers we can respect and recognise that uniqueness.

As Huber astrologers our aim is to learn to see the birth chart in the context of the individual rather than attempt to make the individual fit the birth chart. Our experience, since the first enrolment in the original APA (Astrological Psychology Association) school in 1985, has shown that many of the students not only learn astrology and chart interpretation but also find that the course provides a valuable opportunity for increased self-understanding and personal growth.

The techniques of the Huber Method combine the best of traditional astrology with modern psychological insight and the results of the Hubers' own research. Acquiring an in-depth understanding of the birth chart and its interpretation requires a

big personal commitment and I am dedicated to give every student every support they need in this learning experience. My hope is that each student will get from this experience what he or she needs for their own personal development. My course has no set exams.

Support and assessment is on a continuous basis throughout and we'll work together to forge a high level of competence.

This course was originally registered with the Advisory Panel on Astrological Education (APAE) and was approved by them as meeting the standards required for a Course in Astrology.

**NOTE: This Diploma is recognized and approved by the APAI, the Association of Professional Astrologers international. You will be accepted into the association upon graduation -- a huge benefit and system of support for your practice!**

## Why Should You Choose This Course of Studies?

Astrology is one of the oldest combinations of art and science. Although it has often been exploited and misrepresented throughout history it has also, in knowledgeable and skilled hands, become a valuable tool for human development. We still do not know how or why astrology works, so it is impossible for anyone to claim that they have found the definitive way to interpret a birth chart. However, the approach developed by Bruno and Louise Huber, normally called astrological psychology, has been found by many to be an effective way of looking at the chart and helping the person's growth process. It aims to combine the best of traditional astrology with modern psychological knowledge.

In order that you can decide whether or not you would like to take an interest in astrological psychology and perhaps enrol as a student you'll need some information about the Hubers, upon whose work much of the Course contents are based, and about their approach. I hope that what follows will answer some of your questions.

Bruno and Louise Huber first became interested in astrology over 60 years ago. Both had an early interest in a wide range of subjects including astrology and psychology, and on meeting soon discovered a common attraction and shared a common vision of increasing the quality of human consciousness. After their marriage in 1953 they began serious investigative work into astrology and other subjects, including the esoteric. In 1956 they were invited to help set up the Arcane School in Geneva to promote the work of Alice Bailey and the Lucis Trust. This period lasted two years and ensured that their subsequent work was founded on a deep spiritual understanding. In 1958 Bruno was invited to a seminar in Arezzo by Professor Roberto Assagioli, founder of the transpersonal psychology known as psychosynthesis and of the Psychosynthesis Institute. Bruno established a strong rapport with Assagioli. Bruno and Louise were soon working in Florence as assistants to Assagioli, helping with his research and documenting his work.

It was during this period that they discovered new correlations between the birth chart and psychology, helped by Assagioli's extensive client records. New discoveries included the use of colour in chart representation, the significance of the energy intensity curve in the houses and the Life Clock. More than 40 years of intensive client-centred research since enabled the Hubers to structure a comprehensive system of astrological psychology, the 'Huber Method', which offers a new way of interpreting a birth chart by examining, and giving meaning to, the layers of a human life from the central core of the psyche to the environment in which we live.

### API (UK) and APA

In 1983 Richard Llewellyn and Pam Tyler, who had met the Hubers in Switzerland, got together to discuss the idea of setting up an English Huber School. Pam's studies took her back to America so Richard, in co-operation with the Hubers, established the Astrological Psychology Institute (UK), and wrote the original teaching manuals in the English language, which continue to form the basis of this course. These courses were translated into Spanish, providing the basis for the formation of the Spanish Huber School, and were also translated into German and became a distance learning course. API(UK) was restructured in 2003 into the form of a membership association for all interested in astrological psychology, and incorporated as a limited company in 2009, the Astrological Psychology Association (APA).

The Hubers' teachings have also been substantially documented in series of books, which are now generally available in English. The APA bookshop sells these and a number of supplementary publications that are not available elsewhere.

### **Resolving Contradictions**

Traditional astrological teaching tends to concentrate on using certain basic keywords for interpreting individual signs, planets, aspects etc. As a result, the student often finds that a chart being examined presents fundamental contradictions and paradoxes which are difficult to resolve because they are not being seen in the context of all levels of consciousness. APA courses, that which this course is aligned, lay considerably more emphasis on principles than on keywords, and on the motivation that creates behaviour, rather than just on behaviour itself.

### **New Approach**

This Course teaches the Hubers' exciting new approach to the analysis of a birth chart. The use of colour gives meaning, as does the shaping and direction of aspects and the patterns they make within the hemispheres and quadrants. The houses, representing the areas of life in which we test our abilities in the world, are of great importance and the strengths of the planets within the signs and houses are significant.

### **Psychological Approach**

As a psychologist Bruno Huber recognised that a human being does not exist on one level alone. The Huber approach facilitates recognition and expression of feelings, memories etc., which have been repressed or suppressed into the lower unconscious. These can normally be associated with difficult life events.

### **Childhood Influences**

Some events are likely to relate to the early childhood environment and the influences of parents, education etc. Others may be more recent but all are likely to have some adverse effect on the continuing development of the individual as a balanced, integrated and self-fulfilled person.

### **Unique Beings**

Each of us is born with our own unique personality, and our own pattern of energy, as symbolised by the birth chart. This can become distorted via the influence of others when we are young. Through the relative positions of Sun, Moon & Saturn in the chart we are able to discern the child's subjective view of the parents and whether the relationship was supportive, or will be a restricting tie in adulthood. The Hubers' approach teaches an understanding of the effects, on the adult, of influences brought to bear during their formative years.

### **Life Phases**

Using Age Progression we can become conscious of the phase of psychological development that an individual has reached, and their most rewarding areas of interaction with the environment. This can be valuable when looking at relationship and career situations. We also study transits, time maps, and progressions but the main timing system is Age Point, or Life Clock.

### **Spiritual Dimension**

For many people life may be confined to a two-dimensional "work and play" existence. However successful this may be, there comes a time for many people when this begins to lack substance and satisfaction. Sooner or later most of us experience a need to find a deeper meaning to life, a third 'spiritual' dimension. The birth chart can help to find a path to make this development possible.

### **The Objective**

The natal chart represents the whole and unique person and needs to be seen in that light and not as a scattered and unrelated collection of parts. If we can see a weakness in one area of the chart we can find a solution in another. The knowledge of this possibility puts the individual in a position to solve their own problems. The chart is not seen as an end in itself, but as a means to an end. The objective is to understand the person's psychological motivations and present them in such a way that he or she is encouraged to take full responsibility for his/her own process of individuation
